Defendants.

Case No. 7:24-cv-00114-B

JURY TRIAL DEMANDED

**[Proposed] SECOND AMENDED COMPLAINT**

Plaintiff X Corp. (“X” or “Plaintiff”), by and through its undersigned counsel, brings this action for trebled compensatory damages and injunctive relief under the antitrust laws of the United States against the World Federation of Advertisers; Mars, Incorporated; CVS Health Corporation; Ørsted A/S; Twitch Interactive, Inc.; Nestlé S.A; Nestle USA, Inc.; Abbott Laboratories; Colgate-Palmolive Company; Lego A/S; LEGO Brand Retail, Inc.; Pinterest, Inc.; Tyson Foods, Inc.; Shell plc; Shell USA, Inc.; and Shell Brands International AG, demanding a trial by jury. For its Complaint against Defendants, X alleges the following:

**Nature of the Case**

1. This is an antitrust action relating to a group boycott by competing advertisers of one of the most popular social media platforms in the United States.

2. Acting with and through a World Federation of Advertisers (“WFA”) initiative called the Global Alliance for Responsible Media (“GARM”), the Defendants conspired, along with dozens of non-defendant co-conspirators, to collectively withhold billions of dollars in advertising revenue from Twitter, Inc. (“Twitter,” now X Corp.). Concerned that Twitter might deviate from certain brand safety standards for advertising on social media platforms set through GARM, the conspirators collectively acted to enforce Twitter’s adherence to those standards through the boycott.

3. As a condition of GARM membership, GARM’s members agreed to adopt, implement, and enforce GARM’s brand safety standards, including by withholding advertising from social media platforms deemed by GARM to be non-compliant with the brand safety standards. When Elon Musk and other investors acquired Twitter in November 2022, GARM members reached out to GARM to learn, in the words of Defendant Ørsted A/S, “[GARM’s] perspectives about the Twitter situation and a possible boycott from many companies[,]” and GARM conveyed to its members its concerns about Twitter’s compliance with GARM’s standards, triggering the massive advertiser boycott that followed.

4. Pursuant to the conspiracy, major brand advertisers and advertising agencies, including the Defendants and dozens of non-defendant co-conspirators, agreed to and did, abruptly and in lockstep, boycott Twitter by discontinuing entirely or substantially reducing their previously substantial advertising purchases from Twitter. As Defendant Ørsted A/S reported to GARM months later, when appearing to seek GARM’s permission to resume advertising on Twitter, its participation in the November 2022 boycott had been “[b]ased on your [GARM’s] recommendation.” These actions were all against the unilateral self-interest of the advertisers; they made economic sense only in furtherance of a conspiracy performed in the confidence that

competing advertisers were doing the same. As the same Defendant raised with GARM a few months into the boycott, “Now, some time has passed, and I am curious to know what you would advise us to do. And what are other global advertisers doing – have they come back to the [Twitter] platform, or are they still off?”

5. Internally, GARM celebrated—and took responsibility for—the massive economic harm imposed on Twitter by the boycott, boasting within just a few months of the start of the boycott that “they [Twitter] are 80% below revenue forecasts.”

6. The boycott and its effects continue to this day, despite X applying brand safety standards comparable to those of its competitors and which meet or exceed those specified by GARM.

7. The conduct of Defendants and their co-conspirators is a naked restraint of trade without countervailing benefits to competition or consumers. In a competitive market, each social media platform would set the brand safety standards that are optimal for that platform and for its users, and advertisers would unilaterally select the platforms on which they advertise. Social media platforms that select efficient brand safety standards will thrive; platforms that select inefficient standards will lag behind. Through this competitive process, platforms will discover and adopt the brand safety practices that best promote consumer welfare. But collective action among competing advertisers to dictate brand safety standards to be applied by social media platforms shortcuts the competitive process and allows the collective views of a group of advertisers with market power to override the interests of consumers. The Sherman Act, 15 U.S.C. § 1, does not allow this. The brand safety standards set by GARM should succeed or fail in the marketplace on their own merits and not through the coercive exercise of market power by

advertisers acting collectively to promote their own economic interests through commercial restraints at the expense of social media platforms and their users.

8. The unlawful conduct alleged herein is the subject of an active investigation by the Texas Office of the Attorney General and by the Committee on the Judiciary of the House of Representatives of the Congress of the United States (“House Judiciary Committee”). After extensive investigation—including a review of documents produced in response to subpoenas issued to WFA and to GARM and an interview of a senior GARM executive—the House Judiciary Committee issued an Interim Staff Report on July 10, 2024.

9. That Report concluded: “The extent to which GARM has organized its trade association and coordinates actions that rob consumers of choices is likely illegal under the antitrust laws and threatens fundamental American freedoms. The information uncovered to date of WFA and GARM’s collusive conduct to demonetize disfavored content is alarming.”

### **Parties**

10. X Corp. is a Nevada corporation with its principal place of business in Bastrop, Texas. X Corp. owns and operates the social media platform X, accessible through twitter.com, X.com, and various mobile and online applications. X Corp. merged with Twitter, Inc. in April 2023 and is the successor-in-interest to Twitter, Inc.

11. Defendant World Federation of Advertisers (“WFA”) is an international not-for-profit association organized under the Belgian Companies Code. WFA’s headquarters are in Belgium, and it has an office in New York, New York. GARM was a committee of WFA and reported to the WFA Executive Committee. WFA’s President, Deputy President, and the senior WFA executive who both co-founded and led its GARM initiative live and work in the United States. WFA has, and GARM had, members located in Texas and in this District, and WFA

engages in a substantial volume of commerce throughout the United States and transacts substantial business in this District.

12. The WFA Executive Committee is responsible for the administration, representation, and management of WFA and its activities. Through the WFA Executive Committee, comprising many of the world's largest advertisers, WFA is dominated and controlled by competing advertisers and is dedicated to promoting their collective economic interests. According to WFA:

WFA is the only global organisation representing the common interests of marketers. It brings together the biggest markets and marketers worldwide, representing roughly 90% of global marketing communications spend, almost US\$900 billion annually.

13. Defendant Ørsted A/S (“Ørsted”) is a Danish renewable energy company with its headquarters in Fredericia, Denmark and incorporated in 1972. Ørsted is a publicly listed company with the Kingdom of Denmark as majority shareholder with a 50.1% ownership share. Denmark exercises its ownership interest in Ørsted in accordance with the ordinary governance practices of Danish companies, where a board of non-executive directors (the Board of Directors) and executive directors (the Executive Board) are responsible for the management of the company. Through one or more wholly owned American subsidiaries, Ørsted holds substantial investments in the United States, including wind farming facilities located throughout this District and in the Wichita Falls Division of this District, and transacts substantial business in this District. Ørsted expends substantial sums annually on the promotion of its products and services over the internet, including on social media platforms. Ørsted became a GARM member no later than June 2022.

14. Defendant Mars, Incorporated (“Mars”) is a seller of consumer products and services. Mars is incorporated in Delaware and headquartered in Virginia. Mars expends substantial sums annually on the promotion of its products and services over the internet, including

on social media platforms. Mars was a founding member of GARM and sat on GARM’s Steer Team—the group responsible for “setting priorities for the GARM, addressing impasses and approving solutions.” Mars is also represented on WFA’s Executive Board. Mars transacts substantial business in this District and within the Wichita Falls Division of this District.

15. Defendant CVS Health Corporation (“CVS Health”) provides health services, including health insurance, pharmacy, and clinical services. CVS Health is incorporated in Delaware and headquartered in Rhode Island. CVS Health expends substantial sums annually on the promotion of its products and services over the internet, including on social media platforms. CVS Health became a member of GARM no later than June 2022. CVS Health transacts substantial business in this District and within the Wichita Falls Division of this District.

16. Defendant Twitch Interactive, Inc. (“Twitch”) operates a video live-streaming service. Twitch is incorporated in Delaware and headquartered in California. Twitch expends substantial sums annually on the promotion of its services over the internet, including on social media platforms. Twitch also sells digital advertising inventory to advertisers for display on its live-streaming service. Twitch became a member of GARM no later than June 2022. Twitch transacts substantial business in this District.

17. Defendant Nestlé S.A. is a manufacturer of consumer products incorporated and headquartered in Switzerland. Nestle USA, Inc. (“Nestle USA,” and together with Nestlé S.A., “Nestlé”) is an indirect, wholly owned subsidiary of Nestlé S.A. incorporated in Delaware and headquartered in Virginia. Nestlé expends substantial sums annually on the promotion of its products and services over the internet, including on social media platforms. Nestlé S.A. controlled, directed and encouraged Nestle USA’s anticompetitive conduct as alleged in this Complaint. Nestlé S.A. was a founding member of GARM and is also represented on WFA’s

Executive Board. Nestlé transacts substantial business in this District and within the Wichita Falls Division of this District.

18. Defendant Abbott Laboratories (“Abbott”) manufactures and sells pharmaceutical and other health care products. Abbott is incorporated and headquartered in Illinois. Abbott expends substantial sums annually on the promotion of its services over the internet, including on social media platforms. Abbott became a GARM member no later than June 2022. Abbott transacts substantial business in this District and within the Wichita Falls Division of this District.

19. Defendant Colgate-Palmolive Company (“Colgate”) manufactures and sells consumer products including toothpaste and soap. Colgate is incorporated in Delaware and headquartered in New York. Colgate expends substantial sums annually on the promotion of its services over the internet, including on social media platforms. Colgate became a GARM member no later than June 2022. Colgate transacts substantial business in this District and within the Wichita Falls Division of this District.

20. Defendant Lego A/S manufactures and sells toys and games. Lego A/S is incorporated and headquartered in Denmark. Defendant LEGO Brand Retail, Inc., is an indirect, wholly owned subsidiary of Lego A/S that is incorporated and headquartered in Connecticut. Lego A/S controlled, directed, and encouraged the anticompetitive conduct of LEGO Brand Retail, Inc. as alleged herein. This Complaint will refer to Lego A/S and LEGO Brand Retail, Inc. collectively as “LEGO.” LEGO expends substantial sums annually on the promotion of its services over the internet, including on social media platforms. Lego A/S became a GARM member no later than June 2022. LEGO transacts substantial business in this District and within the Wichita Falls Division of this District.

21. Defendant Pinterest, Inc. (“Pinterest”) operates a social media platform catering to consumers. Pinterest is headquartered in California and incorporated in Delaware. Pinterest expends substantial sums annually on the promotion of its services over the internet, including on social media platforms. Pinterest also sells digital advertising inventory to advertisers for display on its social media platform. Pinterest became a member of GARM in October 2020. Pinterest transacts substantial business in this District.

22. Defendant Tyson Foods, Inc. (“Tyson Foods”) produces and sells food products. Tyson Foods is headquartered in Arkansas and incorporated in Delaware. Tyson Foods expends substantial sums annually on the promotion of its services over the internet, including on social media platforms. Tyson Foods became a GARM member no later than June 2022. Tyson Foods transacts substantial business in this District and within the Wichita Falls Division of this District.

23. Defendant Shell plc is an oil and gas company incorporated and headquartered in England. Defendant Shell USA, Inc. (“Shell USA”) is a wholly owned subsidiary of Shell plc and sells petroleum products. Shell USA is incorporated in Delaware and headquartered in Houston, Texas. Defendant Shell Brands International AG (“Shell Brands”) is a wholly owned subsidiary of Shell plc responsible for development and licensing of the Shell trademark and is incorporated and headquartered in Switzerland. Shell plc controlled, directed and encouraged the anticompetitive conduct of Shell USA and Shell Brands International AG as alleged herein. Shell plc was a founding member of GARM. This Complaint will refer to Shell plc, Shell USA, and Shell Brands International AG collectively as “Shell.” Shell expends substantial sums annually on the promotion of its services over the internet, including on social media platforms. Shell transacts substantial business in this District and within the Wichita Falls Division of this District.

24. For purposes of this Complaint, Defendants Ørsted, Mars, CVS Health, Twitch, Nestlé, Abbott, Colgate, LEGO, Pinterest, Tyson Foods, and Shell are referred to collectively as the “Advertiser Defendants.”

25. Other GARM and WFA members joined as co-conspirators in the acts, violations, and common course of conduct alleged herein, including GARM members headquartered in Texas—and within this District—who joined in the conspiracy by agreeing with WFA and with WFA’s co-conspirators to engage in the unlawful conduct alleged herein, including by means of acts taken in furtherance of the conspiracy within this District.

26. Each Defendant acted as the agent or co-conspirator of or for the other Defendants and non-defendant co-conspirators with respect to the acts, violations, and common course of conduct alleged herein. All Defendants are jointly and severally liable for the acts of all members of the conspiracy.

### **Jurisdiction, Standing, and Venue**

27. This Court has subject matter jurisdiction over Plaintiffs’ claims under 28 U.S.C. §§ 1331 and 1337.

28. Plaintiff has standing to bring this action under Sections 4 and 16 of the Clayton Act, 15 U.S.C. §§ 15, 26.

29. This Court has personal jurisdiction over each Defendant under Section 12 of the Clayton Act, 15 U.S.C. § 22 and/or under the Texas long-arm statute, TEX. CIV. PRAC. & REM. CODE § 17.042. Each Defendant transacts a substantial volume of business in this District. Each Defendant, including WFA, Ørsted, Nestlé S.A, Lego A/S, Shell plc, and Shell Brands, through its participation in the conspiracy alleged in this Complaint and otherwise, has substantial contacts with the United States and with this District. The members of the conspiracy committed substantial

acts in furtherance of that unlawful scheme within the United States, including in this District. And their unlawful conspiracy had foreseeable effects in the United States, including in this District. GARM-member advertisers headquartered in Texas, including within this District, agreed, as a condition of their membership in GARM and otherwise, to engage in the conduct alleged herein.

30. Venue is proper in this District under 15 U.S.C. §§ 15, 22, and 26, and 28 U.S.C. § 1391(b), (c), (d), and (f), because, among other things, each Defendant transacted business, was found, or had agents in this District, and a substantial portion of the affected interstate trade and commerce described herein has been carried out in this District and Division.

31. Ørsted's conduct alleged herein is commercial activity carried on in the United States and/or commercial activity conducted outside the United States causing a direct, foreseeable effect in the United States under 28 U.S.C. § 1605(a)(2). Ørsted conspired with WFA and others in the United States to boycott Twitter in the United States by withholding purchases of advertising from Twitter that would have been made in the United States and communicated with WFA employees located in the United States in furtherance of this conspiracy.

32. The conduct of the Defendants and their co-conspirators alleged herein had and continues to have a substantial effect on interstate commerce in the United States.

### **Factual Allegations**

33. X operates a microblogging social media platform that was founded in 2006 by Twitter, Inc. X's platform allows users to publish text, photos, and videos in posts (previously referred to as "Tweets") that other users may view and interact with. These posts appear sequentially to users in feeds, which occasionally include paid advertisements. X has over 500 million active users every month.

34. X competes with other social media platforms, from which it is differentiated in the degree to which consumers use its platform to keep up to date with news, live events, issues of public policy, and other current affairs.

35. X sells digital display advertising directly to advertisers and advertising agencies. Larger advertisers generally retain the services of advertising agencies to purchase digital advertising on their behalf. Advertisers pay substantial sums for the services of advertising agencies and generally rely on advertising agencies for strategic advice in managing their digital advertising expenditure.

***The Global Alliance for Responsible Media***

36. In June 2019, WFA and some of its members, including seventeen leading advertisers, established GARM as a forum to promote the economic interests of advertisers in connection with the purchase of advertising on digital media and social media platforms. GARM's members included advertisers, advertising agencies, and social media platforms.

37. The Association of National Advertisers ("ANA") Global CMO Growth Council, which is composed of chief marketers from the world's premier brands and had a seat on GARM's Steer Team, joined with WFA to create GARM. The ANA describes itself as "the U.S. advertising industry's oldest and largest trade association." The ANA advances the economic interests of its nearly 1,100 member advertisers representing an estimated 20,000 brands that collectively spend \$400 billion in marketing and advertising each year. The ANA Global CMO Growth Council is an initiative of the ANA intended to facilitate collective action among advertisers to promote their collective economic interests. Between 2019 and 2024, the ANA Global CMO Growth Council identified CVS Health, Shell Brands, LEGO, Abbott, and Nestlé, among many other GARM members, including GARM Steer Team members, as members of its leadership team.

38. A former senior employee of Mars, Rob Rakowitz, co-founded GARM with WFA while still employed at Mars. Rakowitz, who works in WFA's New York office, was the Initiative Lead for GARM and was part of every significant decision made by GARM.

39. GARM was governed by its Steer Team, which functions as GARM's board of directors. The Steer Team comprised representatives of Unilever PLC, Mars, Diageo, P&G, GroupM (the world's largest advertising agency), the American Association of Advertising Agencies (the 4A's, which represents advertising agencies), the Incorporated Society of British Advertisers (ISBA, which represents brands in the United Kingdom), and ANA (which represents brands in the United States). The Steer Team thus included and represented the world's largest advertisers. Rakowitz was supervised by the Steer Team, which reviewed and approved his substantive communications with GARM members. According to Rakowitz, he would consult with the Steer Team before "hav[ing] a conversation around policy and enforcement and consistency" with a GARM member.

40. GARM also included the so-called "Big Six" advertising agency holding companies, which together hold nearly every major advertising agency in the world. In other words, nearly all major agencies that execute advertising campaigns for large companies around the world actively participated in GARM. With WFA accounting for roughly 90% of brand spend on advertising and with GARM including almost every advertising agency and many of the world's biggest brands, GARM members collectively exercise market power in the advertising market.

41. Although GARM membership was broader than advertisers and advertising agencies, the organization was (like WFA itself) dominated and controlled by advertisers, who used it to advance their collective economic interests. In its Charter, GARM stated: "The GARM

is a first-of-its-kind industry-wide, but advertiser-centric community of global brands, media agencies, media owners and platforms, and industry bodies.” Another GARM document stated: “GARM’s governance advances an advertiser-led agenda that focuses on solutions that improve transparency, consistency, control and oversight on content monetization of content in social and digital media.” The composition of GARM’s Steer Team ensured that GARM was run by and for the benefit of advertisers. Rakowitz has explained that digital media and social media platforms—the sellers of digital advertising purchased by advertisers—were excluded from membership on the Steer Team to “avoid conflicts of interest.”

42. GARM was an organization led by and for advertisers. For example, in an internal email among GARM Steer Team members, Rakowitz or another participant drafted proposed talking points for an upcoming discussion with Facebook, a social media platform. One proposed talking point was: “We appreciate the platforms [*sic*] input but we from a governance perspective we [*sic*] must maintain true to our chartering organizations WFA and ANA in being advertiser-driven[.]” An advertiser participant on the email chain, commenting on this talking point, wrote: “What is the point here? If it is to make sure they know we’re running this, again assumed and no need to reiterate.”

43. The avowed purpose of GARM was to leverage the collective market power of its advertiser members to advance their economic interests by forcing changes to the business operations of digital media and social media platforms that sell advertising inventory to GARM members or to their clients. GARM’s Charter recognized the “collective power” of GARM members to achieve this goal through “uncommon collaboration.” Rakowitz has explained: “[U]ncommon collaboration needs to be understood as the industry coming together and putting aside competitive concerns in the interest of safety[.]” In its 2019 press release announcing the

formation of GARM, WFA expressly identified collective action among advertisers at the expense of digital media and social media platforms as the purpose of GARM: “Members of the Global Alliance for Responsible Media recognize the role that advertisers can play in collectively pushing to improve the safety of online environments.”

44. Acting collectively through GARM, advertisers and advertising agencies aimed to realize changes to the business models of digital media and social media platforms that they would have been unable to force the adoption of while acting unilaterally and in uncoordinated rivalry with one another. In 2019, Rakowitz explained the genesis of GARM as frustration among the advertiser members of the GARM Steer Team with their inability to achieve their desired outcomes in negotiations with social media platforms when acting unilaterally:

Roughly a year ago, I drove a breakthrough on the WFA Media Board that point-to-point conversations were getting the industry nowhere; Mars having a conversation with YouTube separate from P&G, and P&G having a conversation with Facebook, and conversations happening at a local and global levels was simply inefficient and not reaching beyond advertising sales teams. In late spring, we started to drive moment around this idea of “uncommon collaboration” to break through the deadlock.

Uncommon collaboration has all sides of the industry together, uncommon collaboration has competitors working together. The goals are to rise above individual commercial interest, focus on consumers and society, to drive focus that is endorsed by major customers of these platforms in a way that cannot be ignored, and finally ensure that there’s access to the right decision makers who haven’t been part of the demands hitherto.

45. In another document describing the collective exercise of market power to dictate results not achievable by advertisers acting unilaterally, GARM explained: “The goal is to remove harmful content from advertiser-supported media on digital media platforms, and ensure that the industry works together to ensure that this is prioritized by executives” of digital media and social media platforms, rather than by the “advertising sales teams” that Rakowitz referenced in the 2019

explanation above as being all that was available to the advertisers when acting unilaterally. In another document, WFA explained that the purpose of GARM was to bargain collectively with advertisers to advance the collective economic interests of GARM-member advertisers, “moving from one-to-one and linear conversations” between advertisers and sellers of advertising “to the collective power offered by our industry response; GARM.”

46. One example of GARM forcing changes to the business operations of social media platforms through the collective exercise of its members’ market power that they could not have achieved unilaterally comes from 2022. Meta, an operator of social media platforms (including Facebook and Instagram) and a member of GARM, announced changes in 2022 to the way in which it reported to advertisers and advertising agencies where advertisements were appearing on its platform.

47. Internally, GARM celebrated this result as the outcome of the exercise of advertisers’ collective market power through GARM. Rakowitz wrote to the CEO of WFA: “This is a big first step for [Meta], and should be acknowledged as a significant win we forced.” *See* Exhibit A at HJC-WFA-GARM-000042864. Referring to an upcoming meeting of the WFA Executive Committee to be held in Greece, Rakowitz wrote: “This should be a message to the ExecCo for Athens - our demands are being met,” and “We need to get the ExecCo to understand that we’re operating with a Roosevelt doctrine of ‘speaking softly and carrying a big stick[.]’” *Id.* at HJC-WFA-GARM-000042863.

#### ***The GARM Brand Safety Standards***

48. WFA organized GARM in part to promulgate standards relating to the placement of advertising on digital media and social media platforms. GARM’s standards include so-called “brand safety” standards, which govern the display of specified types of sensitive content on

advertiser-supported digital media and social media platforms. GARM's standards also specify techniques to implement these brand safety standards and common measures of the implementation of these brand safety standards.

49. GARM described its standardization efforts as involving "common definition, common measures, common tools, and independent verification" of GARM's brand safety standards. According to GARM, "GARM's core work is focused on creating industry standards and solutions in monetization, seeking to improve transparency, consistency, control, and accountability for the placement of ads on content."

50. GARM's standardization efforts were pursued through Working Groups. The GARM Working Groups are managed by WFA and met biweekly for seventy minutes. Resolutions and policies of the GARM developed by the Working Groups were proposed to GARM's members and to GARM's Steer Team and were adopted based on a vote of GARM's members and approval by the Steer Team.

51. There were four Working Groups. GARM's efforts to achieve "common definitions" of brand safety were performed through the Standards and Definitions Working Group; its efforts to achieve "common measures" of brand safety through the Measurement and Oversight Working Group; its efforts to achieve "common tools" through the Adjacency Standards and Controls Working Group; and "independent verification" was assigned to the Independent Verification Working Group.

52. GARM's Standards and Definitions Working Group was focused on the development of "an industry wide common framework of definitions to drive transparency, consistency and control in the placement of ads online." The Standards and Definitions Working

Group was formed in December 2019 and went on to propose the specifications later adopted in September 2020 as the GARM Brand Safety Floor and Suitability Framework.

53. The Brand Safety Floor and Suitability Framework identifies twelve categories of content on digital media and social media platforms. The Brand Safety Floor provides that advertisements may not appear in connection with such content. The Suitability Framework provides that advertisements may appear in connection with social media posts relating to the twelve identified categories only with advertiser consent. The Brand Safety Floor and Suitability Framework was first promulgated by GARM in September 2020 and was updated in June 2022.

54. The GARM Measurement and Oversight Working Group was tasked with agreeing upon an aggregated reporting framework for assessing the adherence of digital media and social media platforms to GARM's Brand Safety Floor and Suitability Framework and other measures of brand safety. The Measurement and Oversight Working Group was formed in July 2020 and went on to recommend the reporting format later adopted in the GARM Aggregated Measurement Report, which was published six times since 2021. GARM encouraged its members to use the GARM Aggregated Measurement Report to monitor the adherence of digital media and social media platforms with the Brand Safety Floor and Suitability Framework.

55. The GARM Adjacency Standards and Controls Working Group was tasked with agreeing upon common measures to define and measure the placement of advertising on digital media and social media platforms. The Adjacency Standards and Controls Working Group formed in 2020 and recommended the specifications later adopted in June 2022 as the GARM Adjacency Standards Framework.

56. The GARM Independent Verification Working Group was tasked with agreeing upon a common framework for the certification of the brand safety practices of digital media and

social media platforms. The Independent Verification Working Group recommended that GARM-member social media platforms be required to obtain verification of their brand safety processes and metrics from two third parties, the Media Ratings Council and the Trustworthy Accountability Group.

57. This Complaint refers to the output of these four working groups, including the Brand Safety Floor and Suitability Framework, the Adjacency Standards Framework, participation in the Aggregated Measurement Report, and recommended brand safety audits, along with ancillary agreements and understandings reached through GARM, as the “GARM Brand Safety Standards.”

58. The ANA Global CMO Growth Council and its members played a key role in the promulgation and wide adoption of the GARM Brand Safety Standards. Members of the Global CMO Growth Council contributed to the development of the GARM Brand Safety Standards and the Global CMO Growth Council itself endorsed GARM and the GARM Brand Safety Standards. By endorsing and supporting GARM, the Global CMO Growth Council encouraged its members to adopt, implement, and enforce the GARM Brand Safety Standards.

59. Between 2019 and 2024, GARM and the GARM Brand Safety Standards were frequently promoted and discussed at ANA Global CMO Growth Council meetings. For example, in June 2022, the CMO Growth Council met in Cannes, France. ANA described the meeting as “intended to drive the industry growth agenda for marketers and prioritize collective actions for the year ahead.” An agenda circulated in advance of that meeting identified “Actions We Need to Take” including “Join GARM and leverage the framework from the Aggregated Measurement Report to evaluate platforms’ safety protocols and enforcement” as an example of an “important action we can take collectively across the industry[.]” Representatives of CVS Health, Nestlé,

LEGO, Shell Brands, and other GARM members, including GARM Steer Team members, presided over this meeting.

60. Between 2019 and 2024, the website for the ANA Global CMO Growth Council urged member advertisers to adopt, implement, and enforce the GARM Brand Safety Standards:

Join the Global Alliance for Responsible Media (GARM) and hold media providers and platforms accountable. Adopt GARM's Brand Safety Floor and Suitability Framework for brand safety standards and provide to your media teams, media agencies, media providers and digital platforms. Set clear expectations that those standards must be enforced. Ask platforms for data on your business, or run your own diagnostics, such as number and percent of hateful content that exists on each platform and how much is eliminated before it is seen.

61. In addition to encouraging CMO Growth Council members to join GARM and to adopt and enforce the GARM Brand Safety Standards, the CMO Growth Council leadership team would periodically update CMO Growth Council members regarding developments in the adoption, implementation, and enforcement of the GARM Brand Safety Standards, including meetings with social media platforms including Twitter to pressure those platforms to adopt, implement and adhere to the GARM Brand Safety Standards. For its part, GARM would periodically report to the CMO Growth Council its progress in forcing social media platforms to adopt, implement and adhere to the GARM Brand Safety Standards.

62. The GARM Brand Safety Standards promote the economic interests of GARM's advertiser and advertising agency members. GARM's advertiser and advertising agency members have an economic incentive to see digital media and social media platforms adopt and adhere to the GARM Brand Safety Standards.

63. By forcing social media platforms to adopt and adhere to the GARM Brand Safety Standards, GARM-member advertisers and advertising agencies force social media platforms to

incur certain costs previously borne by advertisers. Social media platforms host a diverse array of content, and some advertisers do not want their advertisements appearing in connection with or adjacent to some types of content. Before the Brand Safety Standards, each advertiser negotiated individually with social media platforms to customize the reach of its ads and to avoid unwanted content. Some GARM-member advertisers found these individualized negotiations to be unsatisfying and costly and wished to reduce their costs of advertising on social media platforms by forcing the social media platforms to incur those costs instead. Through the Brand Safety Standards, GARM-member advertisers collectively shift to social media platforms a portion of the costs previously borne by advertisers by forcing the social media platforms (i) to proactively remove certain content (that falling below the Safety Floor) and (ii) to adopt tools to allow advertisers to more easily avoid certain other content subject to the Suitability Framework.

64. The changes to the business operations that GARM forced on social media platforms through its Brand Safety Standards were not necessarily in the best interests of those social media platforms or their users. These changes also exceed what GARM members were able to achieve through unilateral and independent negotiations with those platforms. Because social media advertising is an important and growing market for advertisers, GARM members acting unilaterally were unable to force social media platforms to adopt and adhere to the Brand Safety Standards by independently withholding or threatening to withhold their advertising purchases from those platforms. Collective action through GARM using the collective market power of GARM's advertiser and advertising agency members was necessary to force social media platforms to adopt and adhere to the Brand Safety Standards.

65. Thus, although GARM set the Brand Safety Standards, GARM was not a mere standard-setting body. Legitimate standard-setting bodies facilitate collective action among

participants to set voluntary standards while eschewing any agreement among participants as to whether the standards will be implemented by participants or how the implementation of the standard will be enforced. By forcing digital media and social media platforms to adopt and adhere to the Brand Safety Standards, GARM went much further than setting voluntary standards.

***GARM Members Agreed to Follow and Enforce the Brand Safety Standards***

66. In addition to agreeing upon the content of the GARM Brand Safety Standards, GARM's advertiser and advertising agency members agreed (i) to adopt and implement the GARM Brand Safety Standards in their own business operations and (ii) to enforce the implementation of the Brand Safety Standards by the digital media platforms and social media platforms from which they purchase advertising.

67. GARM-member advertisers and advertising agencies agreed to adopt, implement, and enforce the GARM Brand Safety Standards because widespread and uniform adoption and implementation of the Brand Safety Standards promotes the economic interest of those advertisers and advertising agencies by facilitating the collective exercise of their market power. As one GARM document provides: "GARM's standards rely on system-wide adoption in order to realize its goals." GARM explained to its advertiser and advertising agency members, and those members understood, that substantial uniformity in their adoption, implementation, and enforcement of the Brand Safety Standards was important in ensuring that GARM members would collectively control a sufficient volume of advertising purchases, and sufficient market power, to force digital media and social media platforms to adopt and adhere to the Brand Safety Standards. Thus, GARM-member advertisers and advertising agencies have an economic motivation to agree to enforce the adherence of digital media and social media platforms to the GARM Brand Safety Standards to facilitate the collective exercise of their market power.

68. The agreement by and among GARM-member advertisers and advertising agencies to adopt, implement, and enforce the Brand Safety Standards is set forth in GARM’s documents. GARM articulated participation in this conspiracy as a requirement of membership on a page titled “GARM: Frequently Asked Questions,” which provides in relevant part:

**Who can join GARM?**

Any advertiser, media agency, and media platform can join GARM provided they are willing to align with our charter, which calls for uncommon collaboration in confronting this challenge. Member organizations also agree to adopt GARM solutions to improve business operations. Membership currently includes more than 60 of the world’s biggest advertisers, all six major agency holding companies, seven industry groups, and 10 media platforms.

69. The GARM FAQ plainly required GARM-member advertisers and advertising agencies to adopt and implement the GARM Brand Safety Standards in their own business operations. The GARM Brand Safety Standards are “GARM solutions” that “[m]ember organizations also agree to adopt . . . to improve business operations.”

70. The GARM FAQ also plainly required that GARM-member advertisers and advertising agencies adopt and implement the GARM Brand Safety Standards in their business operations with third parties. Specifically, another section of the FAQ specifies the “commitment” GARM required from its members, a “commitment” that includes an “agreement to adopt and implement [GARM] solutions both internally and where working with partners.” Thus, by the plain language of the FAQ document, the Brand Safety Standards were intended to, and did, govern the commercial conduct of GARM-member advertisers and advertising agencies, who committed to implementing those Standards in their purchases of advertising from digital media and social media platforms.

71. The same FAQ document also provides that the required “commitment” of GARM members to “adopt and implement [GARM] solutions both internally and where working with partners” was not limited to unilateral conduct but also involved collective action among GARM members. Specifically, by requiring members to “align with our charter” and to the “uncommon collaboration” called for by that Charter to promote GARM’s goals, GARM, in the FAQ document, contemplated the collective action of its advertising and advertising agency members in enforcing adherence to the GARM Brand Safety Standards, including in their commercial transactions with digital media and social media platforms.

72. The collective action to enforce the GARM Brand Safety Standards contemplated by GARM in the FAQ and in the GARM Charter involved the collective exercise of market power to promote through GARM the economic interests of GARM’s advertiser members. As alleged above, GARM’s Charter recognized the “collective power” of GARM’s advertiser members, and GARM defined “uncommon collaboration” as competitors setting aside unilateral interests—in Rakowitz’s words, “putting aside competitive concerns”—to achieve common goals. Thus, read together, the GARM FAQ and GARM Charter memorialize a conscious commitment to a common scheme among GARM-member advertisers and advertising agencies to enforce the implementation of the GARM Brand Safety Standards by digital media and social media platforms, including through the collective exercise of market power in their commercial transactions with those platforms.

73. The agreement by and among GARM’s advertiser and advertising agency members to adopt, implement, and enforce the Brand Safety Standards is memorialized in a number of GARM documents other than the FAQ and the Charter. For example, in a new member application, GARM explained that members must “agree to work with industry partners and

category peers in a collaborative, non-competitive way, actively support GARM's charter, and agreement [*sic*] to make commensurate changes to business operations in pursuit of GARM's goals."

74. The agreement by and among GARM's advertiser and advertising agency members to adopt, implement, and enforce the Brand Safety Standards is also memorialized in the Brand Safety Floor and Suitability Framework, which provides that "Individual GARM members will adopt these shared principles in their operations, whether they are a marketer, agency, or media platform." The Brand Safety Floor and Suitability Framework provides that advertising agencies "will leverage the framework to guide how they invest with platforms at the agency-wide level and at the individual campaign level." The Brand Safety Floor and Suitability Framework provides that "marketers," or brand advertisers, "will use the definitions to set brand risk and suitability standards for corporate, brand and campaign levels." In another document, GARM described the Brand Safety Floor and Suitability Framework as "Setting the Limits for Advertising Support."

75. The agreement by and among GARM's advertiser and advertising agency members to adopt, implement, and enforce the GARM Brand Safety Standards requires those advertisers and advertising agencies to limit or discontinue their purchases of advertising from digital media and social media platforms not compliant with the Brand Safety Standards.

76. GARM instructed its members to consider a platform's compliance with the GARM Brand Safety Standards in purchasing advertising from that platform. GARM tracked the implementation of the GARM Brand Safety Standards by its advertiser and advertising agency members in their purchases of advertising from digital media and social media platforms, urged its members to increase the percentage of their advertising purchases that were made in compliance

with the Brand Safety Standards, and facilitated discussions among GARM advertisers and advertising agencies about how to achieve that goal.

77. GARM would provide, and GARM members would attend, training sessions aimed at ensuring the adoption, implementation, and enforcement of the GARM Brand Safety Standards in the purchasing of digital advertising by GARM member-advertisers and advertising agencies. Representatives of the Advertiser Defendants attended these training sessions.

78. GARM polled its members about their willingness to purchase advertising from digital media and social media platforms deemed by GARM to be in compliance with the GARM Brand Safety Standards, and disseminated the results of this survey to GARM-member advertisers and advertising agencies with the purpose and effect of inducing those advertisers and advertising agencies to purchase advertising from compliant platforms rather than from platforms deemed by GARM not to be in compliance with the GARM Brand Safety Standards, thereby facilitating the collective exercise of its members' market power.

79. The agreement with and through GARM to adopt, implement and enforce the GARM Brand Safety Standards was widely and commonly understood among GARM members. For example, in 2021 GARM and GARM Steer Team member ISBA wrote, in a reference to the Brand Safety Standards, that: "Individual GARM members will adopt these shared principles in their operations, whether they are a marketer, agency, or other media platform[.]" In 2022, ISBA wrote: "It will be noted that GARM have agreed that where content is part of the Brand Safety Floor, it is not appropriate for it to be supported by any advertising content."

80. GARM member CVS Health manifested its assent to the agreement by and among GARM's advertiser members to adopt, implement, and enforce the Brand Safety Standards by publicly incorporating the GARM Brand Safety Floor into its policies governing its purchase of

paid advertising. Pursuant to its agreements with GARM, and as confirmed by its public statements, CVS Health will not purchase advertising from digital media and social media platforms that do not adhere to the GARM Brand Safety Standards.

81. Twitch and Pinterest manifested their assent to the agreement by and among GARM's advertiser members to adopt, implement, and enforce the Brand Safety Standards by publicly endorsing the GARM Brand Safety Standards, and by communicating its assent to the GARM Brand Safety Standards to GARM. According to GARM documents communicated by GARM to its members, the GARM Brand Safety Standards have received "Executive Endorsement" at Twitch and Pinterest. Twitch has also implemented the GARM Brand Safety Standards in its own content policies. According to one Twitch document, "All content on Twitch must comply with Twitch's policies, called Community Guidelines and Terms of Service. Community Guidelines follow best practices established by the Global Alliance for Responsible Media (GARM), and align to the GARM Brand Safety Content Floor."

82. Other GARM member advertisers have similarly manifested the agreement by and among GARM's advertiser members to adopt, implement, and enforce the Brand Safety Standards, sometimes by stating publicly that they adhere to the GARM Brand Safety Standards in their purchase of digital advertising and endeavor to make no more than one percent of their advertising purchases in connection with content falling below the GARM Brand Safety Floor.

83. Mars, Nestlé, Ørsted, and other GARM members have told X that X's compliance with GARM's Brand Safety Standards and full participation in GARM's internal processes are conditions precedent to the purchase of digital advertising from X by those advertisers.

84. GARM-member advertisers and advertising agencies enforced the implementation of the Brand Safety Standards by digital media and social media platforms in multiple ways,

including by exchanging information with and through GARM (i) about the implementation of the Brand Safety Standards by those platforms and (ii) about actual or potential deviations from those Standards by those platforms. GARM members would, from time to time, bring suspected deviations from the Brand Safety Standards by digital media and social media platforms to the attention of GARM, which in turn would investigate those concerns and whether a platform is adhering to the Brand Safety Standards.

85. Another way in which GARM-member advertisers and advertising agencies enforce the Brand Safety Standards is through advertising boycotts of digital media and social media platforms deemed by GARM not to be complying with the Brand Safety Standards. For example, GARM members, including Mars and CVS Health, boycotted Facebook, Instagram, and Twitter in 2020 with the goal of forcing them to adhere to the Brand Safety Standards. WFA facilitated this boycott by surveying WFA members about their willingness to boycott these social media platforms and disseminating the results of this survey to its members. This boycott ended once Meta and Twitter agreed in discussions with the GARM Steer Team to adhere to the Brand Safety Standards.

86. GARM-member advertisers and advertising agencies commonly looked to GARM to determine the compliance of a digital or social media platform with the GARM Brand Safety Standards and would reduce or discontinue their purchases of advertising from media platforms deemed by GARM not to be complying with the Brand Safety Standards.

87. GARM would, from time to time, in communications with digital media and social media platforms, threaten to communicate to its advertiser and advertising agency members that the media platform is not complying with the Brand Safety Standards. Pursuant to the agreement of GARM-member advertisers and advertising agencies to adopt, implement, and enforce the

Brand Safety Standards, the natural, foreseeable, and intended effect of a communication by GARM that a digital media or social media platform was not adhering to the Brand Safety Standards was to induce a boycott of that platform by GARM-member advertisers and advertising agencies.

88. GARM members would, on occasion, contact GARM to learn GARM's views as to the adherence of digital media and social media platforms with the GARM Brand Safety Standards and whether GARM-member advertisers and advertising agencies would be boycotting media platforms not adhering to the Brand Safety Standards. For example, Coca-Cola contacted GARM on February 17, 2022, seeking information about a possible boycott of Spotify for failure to adhere to the Brand Safety Standards. A Coca-Cola executive wrote:

Specifically I am wondering if anyone has said that they are boycotting Spotify from an advertising perspective. I know that Spotify have recently joined GARM but also aware that they have not published anything around compliance to their policies. It would be great to hear anything you have heard from other advertisers, although I appreciate you might not be able to say which advertisers have made the comments.

*See* Exhibit B at HJC-WFA-GARM-000025817. Rakowitz responded by proffering GARM's views as to Spotify's adherence to the Brand Safety Standards, as well as other information redacted in the version of the email available to Plaintiff. Rakowitz did not, in the unredacted portion of this email, disclaim an interest in facilitating or profess an unwillingness to facilitate a boycott of Spotify. *Id.* The Coca-Cola executive responded by reiterating his request for information about the intentions of other GARM members: "Interested to hear if you have had any members raise concerns with you." *Id.* at HJC-WFA-GARM-000025816.

89. GARM would, on occasion, publish its views on the adherence of digital media and social media platforms with the GARM Brand Safety Standards. These statements were made

after GARM learned of concerns with the adherence of a digital media or social media platform and after consultation with the GARM Steer Team and the CEO of WFA. Rakowitz has explained that these statements were made publicly “to reflect advertiser concerns. It’s to reflect industry best practices. It’s to reflect on our work.” The purpose of these public statements by GARM was to trigger a boycott of those platforms by GARM-member advertisers and advertising agencies by apprising GARM members of GARM’s concerns with respect to a platform’s adherence to the Brand Safety Standards.

90. For example, after being contacted by Coca-Cola on February 17, 2022, about “possibly boycotting Spotify,” Rakowitz wrote to Spotify on February 22, 2022, demanding a meeting between Spotify executives and GARM, including the Steer Team. If Spotify did not give in to GARM’s demands, Rakowitz threatened to publicly convey GARM’s views that Spotify was not adhering to the GARM Brand Safety Standards, which would—pursuant to GARM’s rules—trigger a boycott of Spotify by GARM-member advertisers and advertising agencies, just as Coca-Cola had suggested to Rakowitz five days earlier. Rakowitz wrote to Spotify:

Im [*sic*] sorry but this isn’t working.

We are gravely concerned about the lack of fundamental policies and decision making at your platform.

This is a statement backed by the Steer Team - which you will recall functions as a board of directors and brings together P&G, Unilever, Mars, Diageo, 4As, GroupM, ISBA, ANA[.]

I’m a little disappointed by the lack of seriousness this meeting is being handled with – we’ve held back on press commentary on this incident out of deference.

I’d really like to understand the hold up in securing a root to top with a holistic team covering trust and safety, revenue, etc.

If we’re unable to connect and discuss the issues we’ll only be able to comment with what we’re able to glean.

Exhibit C at HJC-WFA-GARM-000017651-652. Rakowitz forwarded this email to a GARM Steer Team member, writing: “Throttled.” *Id.* at HJC-WFA-GARM-000017651-651.

***The 2022 Boycott of Twitter***

91. Many digital media and social media platforms are free to use for consumers and rely on revenue derived from advertising for profitable operation. In 2022, WFA knew that Twitter was vulnerable to an advertiser boycott by GARM-member advertisers and advertising agencies, as public reports indicated that ninety percent of Twitter’s revenue was derived from advertising.

92. On April 4, 2022, Elon Musk publicly disclosed that he had become Twitter’s largest shareholder. On April 24, 2022, Twitter and Musk announced that they had reached an agreement for a Musk-led shareholder group’s purchase of Twitter in a transaction that ultimately closed on October 27, 2022.

93. WFA was concerned that Musk’s acquisition of Twitter could mark a change in Twitter’s implementation of and adherence to the GARM Brand Safety Standards.

94. WFA organized an advertiser boycott of Twitter through GARM, with the goal of coercing Twitter to comply with the GARM Brand Safety Standards to the satisfaction of GARM. The terms of the boycott agreement were that Twitter must implement and adhere to GARM’s Brand Safety Standards to the satisfaction of GARM as a condition of WFA members purchasing advertising from Twitter. These terms were communicated publicly by WFA and GARM and by members of WFA and GARM. These public communications of the terms on which advertisers would purchase advertising from Twitter served as a focal point for the organization of the boycott. The terms of the agreement to boycott Twitter were also discussed privately among WFA members, including through communications organized and facilitated through GARM.

95. Following the playbook established earlier in 2022 regarding a possible boycott of Spotify, WFA triggered the boycott of Twitter through public statements of its concerns with Twitter's continued compliance with the GARM Brand Safety Standards. These statements were cleared by the GARM Steer Team, including Mars. These statements were intended to, and did, communicate the collective views of Defendants and other competing advertisers, speaking through WFA, about Twitter's adherence to the Brand Safety Standards, a statement that in turn would—pursuant to GARM's rules—implicate the advertising purchasing decisions of GARM-member advertisers and advertising agencies and trigger a boycott of Twitter.

96. WFA issued a public letter to Musk on October 31, 2022, captioned "GARM calls on Twitter to uphold existing commitments on brand safety and deepen future collaboration." The letter stated that:

The Global Alliance for Responsible Media (GARM) is an advertiser-led cross-industry effort to remove harmful content from ad-supported digital media, in the interest of protecting consumers and safeguarding advertiser rights on supporting suitable media content.

Twitter has been a member since the organization was brought together by advertisers in June 2019 and has been a partner with GARM in developing industry standards and applying them to its platform.

Effectively removing harmful content from ad-supported media is a challenging endeavor that requires consistent support, investment and innovation.

Brand safety is non-negotiable for advertisers. The industry has come a long way in developing industry standards that drive increased transparency and control in the interests of consumer safety.

Despite the transition in ownership, we expect Twitter to uphold its previous commitments to GARM and continue to engage with GARM. We are monitoring Twitter's actions, such as setting up a content moderation review panel, and assessing their design,

governance, and potential to improve implementation of digital media safety best practice. We will share these views with members, as we have with previous events.

GARM members will continue to leverage such insights as part of their own independent assessments and decision-making processes.

97. That same day, Rakowitz posted on Twitter, addressing Musk. The post was captioned: “A statement from GARM and [WFA] ... on our work on #brandsafety – we must have Twitter uphold existing agreements and deepen future collaboration – the stakes are simply too high.” The statement said, in relevant part, that:

A new industry-defining standard can be set here, and we’re eagerly awaiting to see how Twitter can uniquely answer this. Platforms should be safe for all, and suitable for advertisers. For advertisers this is non-negotiable – and we expect Twitter to uphold its commitments to GARM.

Rakowitz signed the statement as “Rob on behalf of the Global Alliance for Responsible Media.”

98. Musk responded the same day, posting in response to Rakowitz that “Twitter’s commitment to brand safety remains unchanged.”

99. The purpose and effect of the two public statements made by WFA and GARM on October 31, 2022, were to communicate proposed terms of coordination to competing advertisers. These were written plans for a conspiracy promulgated through the collective action of competing advertisers. Both communications conveyed that GARM had promulgated the Brand Safety Standards; that advertisers collectively desired Twitter to adhere to those Brand Safety Standards to promote the economic interests of the advertisers; that this demand was “non-negotiable”; that WFA and GARM expected Twitter to commit to implementation and adherence to the Brand Safety Standards; and that advertisers would be collectively awaiting evidence of Twitter’s implementation and adherence to the Brand Safety Standards, as determined by GARM, as part of their decision whether to purchase advertising from Twitter.

100. The description of the advertisers' requirement that Twitter be in compliance with the GARM Brand Safety Standards in WFA's two communications of October 31, 2022, as "non-negotiable" was a reference to the preexisting agreement among and between GARM-member advertisers and advertising agencies to adopt, implement, and enforce the GARM Brand Safety Standards, if necessary by a boycott of Twitter.

101. WFA's statement in its October 31, 2022, communication that it would "share these views with members" who would "leverage such insights as part of their own independent assessments and decision-making processes" conveyed to WFA members that WFA would, acting through GARM, make a recommendation relating to future advertising purchases from Twitter, and that members would consider this recommendation in deciding whether to purchase advertising from Twitter. WFA's reference to following this course of action "as we have done with previous events" was a reference to the earlier 2020 boycott of Twitter and other social media platforms facilitated by and through WFA, as well as other instances of the collective exercise of market power by advertisers and advertising agencies through GARM.

102. WFA's October 31, 2022, statements were made publicly, rather than privately, to Twitter to serve as a focal point for the coordination of a group boycott of Twitter. There was no purpose served by the public dissemination of the terms of coordination other than to facilitate collusion by creating common knowledge among WFA's members about the criteria that all of the WFA-member advertisers would be applying in deciding whether to deal with Twitter. By pointedly announcing the same criteria in two communications on the same day, WFA had laid the framework for the boycott that followed. By making those announcements public, WFA ensured not only that every WFA member knew the terms on which WFA proposed to boycott

Twitter, but also that every WFA member knew that *every other WFA member* knew the terms on which WFA proposed to boycott Twitter.

103. Economic theory in the field of industrial organization has identified this type of communication among competitors—the communication of focal points identifying the terms of collusion—as conducive to the formation and implementation of collusive agreements. WFA intended to facilitate a boycott of Twitter through its communications on October 31, 2022.

104. The advertising agency members of GARM quickly followed the October 31, 2022, WFA communications with announcements of their own, recommending to their clients that they suspend paid advertising on Twitter. On or about October 31, 2022, a GARM-member advertising agency, one of the “Big Six” advertising agency holding companies, recommended that clients of one of its agencies suspend all paid advertising on Twitter for at least a week. Another of that GARM-member’s agencies later admitted to Twitter employees that the recommendation was based on concerns that Twitter would not adhere to the GARM Brand Safety Standards. That GARM-member advertising agency later extended this recommendation through at least March 2023. On or about November 1, 2022, GARM member Havas, one of the “Big Six” advertising agency holding companies, recommended that clients suspend paid advertising on Twitter. Sometime between November 2 and November 7, 2022, GARM member Dentsu, one of the “Big Six” advertising agency holding companies, recommended that clients suspend paid advertising on Twitter. No later than November 11, 2022, another GARM-member advertising agency, and one of the “Big Six” advertising agency holding companies, recommended that its clients “pause activity on Twitter in the short term.” No later than November 11, 2022, GARM member GroupM, a component of one of the “Big Six” advertising agency holding companies and a member of the GARM Steer Team, announced that it viewed advertising on Twitter to be “high risk,” a

recommendation to its clients not to advertise on Twitter. No later than December 6, 2022, GARM member Publicis, one of the “Big Six” advertising agency holding companies, recommended that clients suspend paid advertising on Twitter.

105. These recommendations of the GARM-member advertising agencies to refrain from advertising on Twitter were made in furtherance of the boycott plan described by WFA and by GARM on October 31, 2022. For example, GroupM, a member of GARM’s Steer Team, conveyed its November 11, 2022, recommendation to clients to refrain from purchasing advertising from Twitter by reference to WFA and GARM’s prior communications to Twitter, and to the need for collective action through GARM to boycott Twitter, writing:

Our voice, directly and as a leader within GARM is getting a direct audience with Twitter’s new owner and in this exploratory phase for new Twitter management we have the potential to make real change with clear and specific asks. GroupM, in partnership with GARM, have raised industry asks which have been acknowledged positively with a commitment from @elonmusk to maintain Twitter’s commitments to brand safety. We will continue to use our collective voice to advocate for expectations of appropriateness on the platform and to drive change that is valuable for advertisers and users alike.

106. The recommendations of the GARM-member advertising agencies to their clients to refrain from advertising on Twitter were widely followed. Many of Twitter’s largest advertisers discontinued or curtailed their purchases of advertising from Twitter as a direct result of these recommendations. GroupM clients, including GARM members and Defendants Abbott, Colgate, Mars, Nestle USA, Shell, and Tyson Foods, received GroupM’s recommendation to refrain from purchasing advertising from Twitter as part of a plan to exert collective leverage on Twitter through GARM and knowingly joined in the conspiracy by refraining from purchasing advertising from Twitter.

107. On November 3, 2022, Musk met with representatives of more than 100 advertisers and advertising agencies to assure them of his intent and plans to keep Twitter attractive to advertisers. GARM perceived these meetings directly between Twitter and advertisers and agencies as a threat to GARM's ability to bargain collectively on behalf of its members.

108. On November 4, 2022, Rakowitz wrote to Twitter, noting the possibility of an advertiser boycott of Twitter. Specifically, Rakowitz wrote "I do recognize however that there are calls for boycotts and counter-boycott – this is not good for any party to engage in conversations around." Rakowitz also wrote that "I do also recognize that there is a spiral of escalation getting out of control – and I do think that this cycle must be disrupted." Rakowitz invoked the threat of a boycott in his written communications with Twitter to induce Twitter to attend to GARM's demands, which Rakowitz communicated to Twitter days later on November 8, 2022, propounding a set of questions for Twitter relating to Twitter's adherence to the Brand Safety Standards that Rakowitz characterized as having "been sourced by the GARM Steer Team via their relevant membership base." Rakowitz wrote again on November 9, 2022, demanding that Twitter answer the questions propounded the day before. Once again, Rakowitz threatened Twitter with commercial consequences if Twitter failed to accede to GARM's demands, writing in his November 9<sup>th</sup> email that Twitter's failure to provide the information demanded by Rakowitz on behalf of the GARM Steer Team the day before was creating a "mushrooming effect," a reference to an increase in the risk of the boycott threats conveyed by Rakowitz on November 4, 2022.

109. In November 2022, GARM membership discussed an assessment developed by the GARM Steer Team of Twitter's implementation of GARM's Brand Safety Standards. The assessment developed by the GARM Steer Team noted "Brand Safety Concerns" with Twitter's "Adherence to GARM Standards."

110. Between November 7 and November 14, 2022, the GARM Steer Team conducted a survey, described as a “WFA-GARM Benchmark Survey,” of WFA members and GARM members, including both advertisers and advertising agencies. The survey sought information relating to the plans that these competing advertisers had with respect to purchasing advertising from Twitter in light of Musk’s acquisition of the company. The purpose and effect of the survey was to facilitate a boycott of Twitter by gathering and then disseminating information about the willingness of competing advertisers to boycott Twitter, as WFA had previously done with a survey conducted in connection with the 2020 boycott of Twitter and other social media platforms. One hundred eighteen advertisers and advertising agencies that were members of WFA and GARM responded to the WFA-GARM Benchmark Survey. Rakowitz shared the results of the survey with members of the WFA Executive Committee and widely among GARM members.

111. On November 4, 2022, GARM member Ørsted contacted Rakowitz seeking guidance as to GARM’s views of Twitter’s compliance with the GARM Brand Safety Standard and of an advertiser boycott of Twitter. Ørsted’s November 4, 2022, email stated:

I’m reaching out to you to ask you if it’s possible to arrange a meeting and hear more about your perspectives about the Twitter situation and a possible boycott from many companies.

As you know we have a lot of focus on responsible marketing and we are about to make a recommendation to management about actions and when we need to consider whether we should continue promotion on the platform or find alternatives. It is an important platform for us in the US market and it will have an impact that we need to asses[s] and outline.

Is this something you can help us with by setting up a meeting Wednesday next week to hear your perspectives and advise?

See Exhibit D at HJC-WFA-GARM-000051210-211.

112. In seeking GARM’s “perspectives on the Twitter situation and a possible boycott from many companies” in deciding whether to continue purchasing advertising from Twitter, Ørsted was following the plan described in WFA’s October 31, 2022, communication, which contemplated that WFA would share its views with members about Twitter’s adherence to the GARM Brand Safety Standards and that advertisers would use that information in deciding whether to continue purchasing advertising from Twitter.

113. Ørsted was also seeking GARM’s recommendation on participation in a boycott of Twitter pursuant to Ørsted’s preexisting agreement as a GARM-member advertiser to adopt, implement, and enforce the GARM Brand Safety Standards and to consider, in purchasing advertising, the compliance of digital media and social media platforms with those standards as determined by GARM.

114. Ørsted was willing to follow GARM’s recommendation even though Twitter was “an important platform for [Ørsted] in the US market.” *See* Exhibit D at HJC-WFA-GARM-000051211. Because Twitter was “an important platform for [Ørsted] in the US market,” before reducing its purchases of advertising, Ørsted sought assurances from GARM that other GARM members would be doing the same.

115. On November 7, 2022, Ørsted wrote again: “I haven’t heard from Rob and the Twitter issue is critical to us. Would you be able to help us and set up a meeting where we can learn more?” *See* Exhibit D at HJC-WFA-GARM-000051210.

116. A WFA employee other than Rakowitz responded the same day, writing:

I hope you’re doing well. While I don’t manage Rob’s calendar, I can certainly nudge him to see when he is available. I assume he is waiting to get back to you as I’ve just sent out a survey to some of our members to gauge their perceptions on the issue. We will have the results from that survey by EoW, have been in constant contact with Twitter and plan to meet with Elon in the coming weeks.

Would it make sense to schedule something next week after the survey results come in?

*See* Exhibit D at HJC-WFA-GARM-000051210. The WFA employee did not, in this email, disclaim an interest in or profess an unwillingness to facilitate a boycott of Twitter. In responding to Ørsted’s request for GARM’s “perspectives on the Twitter situation and a possible boycott from many companies,” the WFA employee described the WFA-GARM Benchmark Survey as “a survey to some of our members to gauge their perceptions on this issue.” *Id.*

117. Ørsted responded on November 8, 2022, writing:

It sounds good with [t]he survey and the talk with Twitter and Elon Musk.

We would very much like to know more as soon as you have the results. When do you expect to have it? Do you think Tuesday next week is realistic to share the results and your recommendations?

Do you have a description on the situation that you can share?

*See* Exhibit D at HJC-WFA-GARM-000051209. Once again, Ørsted was seeking GARM’s “recommendation” with respect to Ørsted continuing to purchase advertising from Twitter. In this communication, Ørsted identified the results of the WFA-GARM Benchmark Survey as an important piece of information that it desired to obtain and use in deciding whether to continue purchasing advertising from Twitter. After receiving this November 8, 2022, email from Ørsted, Rakowitz formulated recommendations intended for dissemination by GARM to GARM members advising GARM members to refrain from purchasing advertising from Twitter. Rakowitz communicated these recommendations to GARM members.

118. Ørsted wrote again to Rakowitz on November 14, 2022:

We are following the conversation and communication about the Twitter situation very closely. It seems like some agencies are now starting to recommend their clients to pause all advertising on the platform.

We would like to make a situation/complication/resolution presentation to top management based on your recommendations.

Do you know when you have more info from the survey you sent out last week - and can we arrange a meeting one of the coming days where you share your reflections and results?

*See* Exhibit D at HJC-WFA-GARM-000051209. Once again, Ørsted was seeking GARM's "recommendations" with respect to Ørsted continuing to purchase advertising from Twitter. Once again, Ørsted identified the results of the WFA-GARM Benchmark Survey as an important piece of information that it desired to obtain and use in deciding whether to continue purchasing advertising from Twitter.

119. In reply, a WFA employee offered to speak with Ørsted on November 17, 2022. *See* Exhibit D at HJC-WFA-GARM-000051209. The WFA employee did not in this email disclaim an interest in, or profess an unwillingness to facilitate, a boycott of Twitter or deny that GARM had made or would be making a recommendation as to participation in such a boycott.

120. Ørsted wrote again to Rakowitz on December 2, 2022:

I know you had planned to have a meeting yesterday with Elon Musk. Is it possible to arrange a meeting next week to learn more about how the conversation went and how you see the situation now and expectations going forward?

*See* Exhibit D at HJC-WFA-GARM-000051208. Rakowitz responded: "This is likely to come up and be discussed in the Community Call on Thursday next week. Can we discuss then and there?"

*Id.* GARM's Community Calls were monthly events with a scheduled duration of ninety minutes. Participation in Community Calls was an expectation for GARM members, and the events were widely attended by senior executives of GARM-member advertisers and advertising agencies with responsibility for the purchasing of advertising. Ørsted wrote again on December 7, 2022, seeking confirmation that Rakowitz would indeed be discussing these topics in the upcoming Community

Call, and Rakowitz confirmed that was indeed the case. *See* Exhibit D at HJC-WFA-GARM-000051207-208.

121. A document prepared by GARM for the WFA Executive Committee on November 28, 2022, related to an upcoming meeting among WFA Executive Committee members, GARM Steer Team members, and Musk and others from Twitter. The document stated that WFA Executive Committee members and GARM Steer Team members would be prepared to “ask some prepared and pointed questions” on a number of topics, including “The role of advertising in Twitter’s future” and “The plan to close the gap on slipping standards on controlling harmful content, reporting delays, changes in monetized users, [*sic*].”

122. In advance of a December 1, 2022, meeting with Musk and other Twitter executives, WFA prepared to expel Twitter from GARM if its demands were not met in a timeframe acceptable to GARM. Rakowitz opined that taking a firm stance with Twitter by expelling Twitter from GARM for non-compliance with the GARM Brand Safety Standards would send a desirable message to other digital media and social media platforms about the costs and consequences of non-compliance with the Brand Safety Standards, and thereby induce those media platforms to adhere to the Brand Safety Standards. In preparing for the meeting, Rakowitz outlined his proposed requirements for Twitter to remain a member of GARM:

1. Responsiveness to requests within a reasonable amount of time  
[72 business hours]
2. Demonstrable support of the GARM Brand Safety Floor globally  
inclusive of policies and tools
3. Regular participation in GARM Working Groups relevant to  
member organization type

123. At the December 1, 2022, meeting with GARM and WFA, which representatives from Mars and Nestlé, among others, attended, Twitter agreed to take certain steps to adhere to

the GARM Brand Safety Standards. While some members of the GARM Steer Team were pleased with the concessions made by Twitter, other members of the Steer Team were not. In a December 3, 2022, communication about the press release to be issued regarding the December 1 meeting, Rakowitz explained that:

Separately, I connected with the 4As and GroupM yesterday – they’re pleased with the concessions - especially the social listening - since that proves/disproves the safety of the platform. UL will not trust until they see the data and have said they have issues with overtly partisan takes (e.g., Hunter Biden laptop expose.)

124. On December 5, 2022, WFA issued a statement about its discussions with Musk.

The statement was titled “WFA and GARM meet Musk to discuss brand safety” and announced:

On December 1st, the WFA Executive Committee met with Twitter’s new leadership team to discuss Twitter’s commitments to brand safety and the Global Alliance for Responsible Media (GARM), which Twitter reinforced.

WFA held this meeting to discuss advertiser concerns on the platform under Chatham House Rules. The conversation focused on Twitter’s continued commitments to GARM around common definitions, common measures, common tools and independent verification.

Twitter’s leadership was engaged and committed to working with GARM to document brand safety measures currently in place and develop a roadmap for future improvements, on an accelerated but mutually agreed timeframe.

The GARM Steer Team will work with Twitter and make this roadmap for improved brand safety measures public in due course.

WFA’s promise to share publicly a plan for bringing Twitter into compliance with the GARM Brand Safety Standards was intended to and did provide a roadmap for the advertisers and advertising agencies boycotting Twitter to understand the terms on which the boycott would continue and, upon GARM’s permission, might someday end. Twitter employees understood from

this statement of WFA that the resumption of advertising by GARM members from Twitter was conditioned on Twitter's adherence to the GARM Brand Safety Standards.

125. On or about December 8, 2022, GARM members convened for their monthly Community Call, which was widely attended by senior executives of GARM-member advertisers and advertising agencies. According to GARM, on this call, there was "extensive debriefing and discussion around Elon Musks' [sic] takeover of Twitter," as well as a discussion of the commitments Twitter had made to comply with the GARM Brand Safety Standards, the results of the WFA-GARM Benchmark Survey of GARM-member advertisers and advertising agencies, and GARM's expectations of Twitter going forward.

126. On December 19, 2022, WFA issued a statement about its discussions with Musk. The statement was titled, "Twitter announces its acceleration agenda with GARM to answer brand safety needs," and provided a summary of steps Twitter had agreed to take to implement and adhere to the GARM Brand Safety Standards. The statement noted: "Twitter are [sic] already working against these mechanisms, many of which were shared with the GARM Community in its December Community Call."

127. In seeking to become GARM members and to demonstrate to advertisers their adherence to the Brand Safety Standards, other sellers of digital advertising referenced GARM's actions against Twitter and their perception that GARM and its members had deemed Twitter not to be complying with the GARM Brand Safety Standards and taken disciplinary action against it. For example, Quizlet—a digital platform and advertising seller—emailed GARM on November 22, 2022, asking in part: "Is there a way for Quizlet Ads to become 'approved' or 'certified' by GARM? I found the framework online, is there a way for publishers to use the framework to show that they are following the GARM standards?" In a subsequent email, Quizlet referred expressly

to GARM's action against Twitter: "Other than the Twitter statement that was released a few weeks ago, are there others [*sic*] cases where GARM took any kind of action against a company that has claimed to be in line with GARM standards?"

128. GARM internally discussed the connection between its conduct and the advertiser boycott of Twitter, as well as delighting in the enormous harm that its boycott had already caused. While editing a February 2023 draft of an email to TikTok regarding brand safety issues, Rakowitz wrote: "I'd like to point out that nowhere in this email is the 'you may recognize my name from being the idiot who challenged Musk on brand safety issues. Since then they are 80% below revenue forecasts.'" *See* Exhibit E at HJC-WFA-GARM-000030997. Rakowitz appended a form of smiley-face emoji to the end of this message. *Id.*

129. On March 13, 2023, Ørsted wrote to WFA employees, including Rakowitz:

Since the news about Elon Musk acquiring Twitter, we chose to take off all of our paid advertisement on the platform due to brand safety concerns. This was decided in Q4 2022. Now, some time has passed, and I am curious to know what you would advise us to do. And what are other global advertisers doing - have they come back to the platform, or are they still off?

*See* Exhibit F at HJC-WFA-GARM-000026945.

130. Nine days later, the House Judiciary Committee contacted GARM in connection with the Committee's investigation of GARM.

131. Subsequently, Ørsted contacted Twitter about the possibility of resuming its purchase of advertising from Twitter, writing to Twitter on April 12, 2023:

For your info, we are currently off the platform with paid advertisement due to brand safety concerns after Elon Musk's acquisition of the platform. We are continuously evaluating whether or not to go back, as twitter [*sic*] is an interesting platform for us to reach our audience, so super keen to get more info from you on this topic, when we meet[.]

132. For its part, now aware that its activities had attracted interest from the House Judiciary Committee, WFA did not respond to Ørsted's March 13, 2023, email. On April 14, 2023, Ørsted wrote to Rakowitz and others at WFA:

Hi again

Can you please advise me on the latest updates regarding Twitter?  
Or perhaps you have a place where I can read more about your perspective on Twitter as a platform after Elon Musk's acquisition?

Based on your recommendations, we have stopped all paid advertisement, because the platform was rather unsafe due to Elon Musk's decision of firing a lot of ressources [*sic*] etc, and therefore little control over the content on the platform. But its [*sic*] an important platform for us to reach our audience, so we would like to consider going back, we just need to know whether or not the platform is safe.

Thanks!

*See Exhibit F at HJC-WFA-GARM-000026944.*

133. Rakowitz, now conscious of the Committee's investigation, responded to Ørsted four days later, on April 18, 2023, falsely denying that WFA or GARM had made any recommendation with respect to advertising on Twitter. *See Exhibit F at HJC-WFA-GARM-000026943-944.*

134. In July 2023 GARM communicated its dissatisfaction with Twitter's implementation of the "acceleration agenda" and with Twitter's adherence to the GARM Brand Safety Standards to its advertiser and advertising agency members, and to Twitter. Advertisers, including both GARM member-advertisers and advertisers advised by GARM's advertising agency members, thereafter cited GARM's dissatisfaction with Twitter's adherence to the GARM Brand Safety Standards as reasons not to purchase advertising from Twitter.

135. In August 2023, Ørsted discontinued its discussions with Twitter regarding a resumption of advertising on Twitter, citing concerns about Twitter's ability to verify its adherence to the GARM Brand Safety Standards as its rationale for continuing to boycott Twitter. Ørsted wrote: "At Ørsted, it is evident that our foremost current focus revolves around the diligent adherence to the GARM Safety Framework through our presence on Twitter."

***Implementation and Effect of the Boycott***

136. As desired and intended by the conspirators, shortly after Twitter's merger with the Musk-controlled entities, a substantial portion of Twitter's existing advertising customers, including both GARM-member advertisers and advertising agencies, as well as advertisers who were clients of GARM-member advertising agencies, abruptly discontinued or sharply curtailed their purchases of advertising from Twitter.

137. Between November 2022 and December 2022, at least eighteen GARM-member advertisers stopped purchasing advertising from Twitter either in the United States or worldwide. Of the remaining GARM-member advertisers that had been purchasing advertising from Twitter in October 2022, dozens more substantially reduced their purchases of advertising from Twitter (and then X) over the course of 2023, in many instances by over 70 percent. The Advertiser Defendants and the other GARM-member advertisers, including GARM members located in this State and in this District, discontinued or curtailed their purchases of advertising as a result of communications facilitated by and through WFA and knowing by virtue of those communications that other GARM-member advertisers and advertising agencies would do the same.

138. The Advertiser Defendants and other GARM-member advertisers acted in parallel to discontinue their purchases of advertising from Twitter, in a marked departure from their prior

pattern of purchases. Mars purchased no advertising from Twitter (or X) in the United States, and only a *de minimis* amount outside the United States, after October 2022. Tyson Foods purchased only a *de minimis* amount of advertising from Twitter (or X) after November 2022. Ørsted, Abbott, Colgate, LEGO, and Pinterest purchased no advertising from Twitter (or X) after November 2022. Twitch, Nestlé, and Shell purchased no advertising from Twitter (or X) in the United States, and only a *de minimis* amount outside the United States, after November 2022. CVS Health sharply cut its purchases of advertising from Twitter in November 2022, cut them again in December 2022, and purchased no advertising from Twitter (or X) after December 2022.

139. Other advertisers that were not GARM members but were clients of the “Big Six” advertising agencies that were GARM members similarly ceased purchasing advertising from Twitter between November 2022 and December 2022 and have purchased no advertising since then. For example, one such advertiser admitted to Twitter employees that it did so due to its GARM-member advertising agency’s recommendation to stop purchasing advertising from Twitter. Other clients of that same GARM-member advertising agency have cited that advertising agency’s recommendations as a material factor in their decision to substantially reduce their purchases of advertising from Twitter, including in extended periods of time in which those advertisers purchased no advertising from Twitter.

140. Another GARM-member advertising agency’s recommendation to its clients to refrain from purchasing advertising on Twitter (now X) remained in place from November 2022 until at least May 2023, after which its recommendation for clients with heightened brand sensitivity was to proceed only “with caution.” By contrast, that advertising agency frequently will “green light”—or affirmatively approve—purchases of advertising from other digital media and social media platforms. That GARM-member advertising agency changed its

recommendation to its clients in May 2023 after demanding and receiving assurances by Twitter that Twitter would comply with the GARM Brand Safety Standards. In its cautionary May 2023 guidance to clients, that GARM-member advertising agency conditioned its recommendation on WFA's verification of Twitter's compliance with the GARM Brand Safety Standards and wrote that it "is active within the Global Alliance for Responsible Media (GARM) across these topics and continues to work with GARM to ensure Twitter up-hold their commitments to the GARM floor." Many of that GARM-member advertising agency's clients have from November 2022 through the present generally refused to purchase advertising from Twitter (and now X) due to that advertising agency's recommendations to refrain from, or to proceed only with caution in, purchasing advertising from Twitter (now X).

141. The boycott of Twitter (and now X) organized by and through GARM continues to the present day despite the fact that X's brand safety practices meet or exceed those specified by the GARM Brand Safety Standards. More than 99 percent of X's measured ad placement in 2023 and 2024 appeared adjacent to content scored above the GARM Brand Safety Floor, in line with industry standards. X offers robust functionality to give advertisers control over where their advertisements appear on X's platform. This allows advertisers to ensure their ads are not served alongside content that doesn't align with their brand's message and values. However, GARM never rescinded its recommendation to GARM-member advertisers and advertising agencies to refrain from purchasing advertising from Twitter, now X. The Advertiser Defendants and other GARM members have adhered to and implemented this recommendation. For example, Nestlé S.A. instructs its subsidiaries, including Nestle USA, to presumptively refrain from purchasing advertising from Twitter, now X, as a "high-risk" platform.

142. The advertising boycott of Twitter (and now X) is contrary to the economic self-interest of the boycotting advertisers, absent the conduct challenged herein. Due to the boycott of Twitter, prices charged by Twitter for advertising declined substantially beginning in November 2022 and remain well below those charged by X's closest competitors in the social media advertising market. By refraining from purchasing advertising from X, boycotting advertisers are forgoing a valuable opportunity to purchase low-priced advertising inventory on a platform with brand safety that meets or exceeds industry standards.

143. Instead, as a result of their agreement to boycott Twitter (and now X), GARM-member advertisers and advertising agencies are paying prices above competitive levels for advertising inventory purchased from social media platforms deemed by GARM to be adhering to the GARM Brand Safety Standards, including from Defendant Pinterest. Because digital advertising on social media platforms is a product without close economic substitutes, the boycott of Twitter predictably caused GARM-member advertisers and advertising agencies to shift their advertising purchases to other social media platforms rather than to other sellers of advertising. These other social media platforms do not need to lower the price at which they offer to sell advertising to match the low prices offered by Twitter (and now X) because these other social media platforms are all GARM members and know that GARM-member advertisers and advertising agencies have agreed not to purchase advertising from Twitter (and now X), eliminating the need for these other social media platforms to compete with Twitter (and now X) in the sale of advertising to GARM-member advertisers and advertising agencies.

144. The boycott of Twitter, and now X, is also contrary to the unilateral economic self-interest of the Advertiser Defendants because Twitter, and now X, is differentiated from other social media platforms in terms of its audience of more affluent users and the degree to which it

serves as a platform for public affairs, public policy, and current events. More than 80 percent of X's users are in the 18-44 age demographic, which is the most highly coveted advertising demographic, and other social media platforms have users that tend to be in less desirable demographics for advertisers, either because they are younger (*e.g.*, Snap, TikTok, Instagram) or older (*e.g.*, Facebook, LinkedIn, Pinterest).

145. Ørsted, for example, had strong unilateral incentives to purchase advertising on Twitter, and now X, due in part to the influence of public policy and public policy makers on the products marketed by Ørsted, including wind turbines and other clean energy solutions. As a result, Ørsted displayed strong interest in purchasing advertising from Twitter, and now X, absent the restraint imposed on Ørsted's unilateral decision making by its membership in GARM and its conscious commitment to adopting, implementing, and enforcing the GARM Brand Safety Standards, writing that Twitter was an "interesting platform" and an "important platform for us to reach our audience." Ørsted's boycott of Twitter, and now X, made economic sense only as part of an agreement with competing advertisers through GARM, as demonstrated by Ørsted's frequent requests for guidance from GARM and for information about the purchasing plans of other GARM members, its competitors in the purchase of social media advertising.

***Relevant Markets and Market Power***

146. The relevant product market in which to assess the conduct of Defendants and their co-conspirators alleged herein is the market for digital advertising on social media platforms. X is a seller in the relevant product market, and the Defendants and their co-conspirators are purchasers in the relevant product market. Digital advertising sold by social media platforms has distinct characteristics that differentiate it from digital advertising sold by other types of digital platforms, including search advertising, and from offline print, radio, and broadcast advertising.

147. Digital advertising is differentiated from offline “traditional” media due to the ability of advertisers to use data to target specific audiences online.

148. Digital advertising consists of display and search advertising. Display advertising refers to the display of advertisements—in the form of images, text, or videos—on websites or apps when a user visits or uses them. Search advertising is a form of digital advertising that is shown to a person when he or she enters a specific search term in an online search engine, like Google or Bing.

149. Display and search advertising are not substitutable because they perform different roles in the sales process. Search advertising is intent-based—designed to encourage consumers who have already shown interest in buying the product to make a purchase—whereas display advertising is suitable for raising brand awareness and reaching new audiences that might not yet have shown interest. Additionally, search advertising is text-based and, therefore, provides limited space for the client’s creative message, while display advertising can be used for imagery and video. In recognition of this differentiation between display and search advertisements, advertisers generally have different teams dedicated to display and to search advertising and have separate budgets for those two distinct types of advertisements.

150. Social media advertising is differentiated from other forms of digital display advertising. Because social media platforms generally require users to create an account and allow for users to interact with user and advertiser-generated content on the platform, advertisers on social media can target their advertisements to reach highly specific audiences in a way not possible through other forms of digital display advertising. Social media advertising and other forms of digital display advertising are sold through distinct distribution channels, with social media platforms selling advertising inventory directly to advertisers and advertising agencies, and

other forms of online display advertising inventory being sold through a complex ecosystem of intermediaries not active in the sale of social media advertising.

151. Social media advertising is commonly sold by social media companies, including Twitter (and now X), pursuant to an auction. Advertisers compete against one another by bidding for available advertising inventory, with the winning bid displayed to a user of the platform. Regardless of whether advertisers compete with one another in their downstream product or service markets, those advertisers are direct, head-to-head competitors in the purchase of social media advertising from Twitter, and now X.

152. One relevant geographic market is the world. Social media platforms sell digital advertising inventory to advertisers located around the world, and social media platforms are generally accessible worldwide. The Defendants and their co-conspirators purchase digital advertising inventory from social media platforms worldwide. Another relevant geographic market is the United States. Social media platforms sell digital advertising inventory for display in specific markets, including in the United States. The Defendants and their co-conspirators purchase digital advertising inventory for display in the United States.

153. The Defendants and their co-conspirators have market power, called monopsony power on the buy side, in the relevant market, controlling ninety percent or more of spending in the relevant market.

154. X has suffered injury and damages from the boycott alleged herein. Competition in the market for digital advertising on social media platforms has been restrained by the boycott. The boycott had and continues to have its natural and intended effect on X's business operations. Existing advertising customers ceased or curtailed their purchases of advertising from X, and new customers were deterred or restrained from purchasing from X, leading to lost revenue and profit

for X and diminishing its equity value and goodwill. The majority of X's advertising revenue today comes from small- and medium-sized businesses that are not GARM members or clients of GARM-member advertising agencies. As demand for advertising on X has declined as a result of the boycott, the price X's remaining advertisers are willing to pay has declined as well.

155. As a result of the boycott, X became a less effective competitor to other social media platforms in the sale of digital advertising and in competing for user engagement on its platform. By sharply curtailing its revenues, the boycott has reduced X's ability to invest in new or improved functionality, thus harming the consumers who use X's platform.

### **X's Claims for Relief**

#### **Count One – Group Boycott (All Defendants)**

156. Plaintiff realleges Paragraphs 1–155 above.

157. The conduct of Defendants and their co-conspirators alleged herein is a group boycott in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1. Defendants and their co-conspirators agreed to boycott Twitter by withholding purchases of digital advertising from Twitter.

158. The conduct of Defendants and their co-conspirators alleged herein is *per se* illegal, or, in the alternative, illegal under the Rule of Reason or “quick look” analytical framework. There are no procompetitive effects of the group boycott, which was not reasonably related to, or reasonably necessary for, any procompetitive objectives of the GARM Brand Safety Standards. Alternatively, there are no procompetitive effects of the group boycott that outweigh its substantial anticompetitive effects or that could not be achieved through less restrictive means.

159. The conduct of Defendants and their co-conspirators has caused injury and damage to X in the form of lost profits.

160. The conduct of Defendants and their co-conspirators has caused injury and damage to X in the form of diminished equity value and goodwill, diminishing the value of X as a going concern.

**Count Two – Information Exchange (All Defendants)**

161. Plaintiff realleges Paragraphs 1–155 above.

162. The conduct alleged herein constitutes an unlawful agreement to exchange competitively sensitive information among competing advertisers in violation of Section 1 of the Sherman Act, 15 U.S.C. § 1. Defendants and their co-conspirators agreed to exchange information relating to their willingness and intent to boycott Twitter by withholding purchases of digital advertising from Twitter.

163. The conduct of the Defendants and their co-conspirators alleged herein is unlawful under the Rule of Reason as facilitating a boycott of X. Through GARM, Defendants and their co-conspirators exchanged, disseminated, and discussed non-public, forward-looking, and competitively-sensitive information relating to the intentions of competing advertisers with respect to the purchase of digital advertising from Plaintiff. The information exchange had the likely and actual effect of making each competing advertiser's decision to curtail the purchase of digital advertising from Plaintiff more likely and more profitable than would have otherwise been the case by increasing the confidence of each boycotting advertiser that its rivals would do the same, facilitating the collective exercise of market power by the boycotting advertisers. There were no procompetitive effects of the information exchange facilitated by and through GARM, which was not reasonably related to, or reasonably necessary for, any procompetitive objectives of the GARM Brand Safety Standards. Alternatively, there are no procompetitive effects of the information

exchange that outweigh its substantial anticompetitive effects or that could not be achieved through less restrictive means.

164. The conduct of Defendants and their co-conspirators has caused injury and damage to X in the form of lost profits.

165. The conduct of Defendants and their co-conspirators has caused injury and damage to X in the form of diminished equity value and goodwill, diminishing the value of X as a going concern.

### **Prayer for Relief**

Wherefore, Plaintiff respectfully prays for relief and judgment against Defendants as follows:

- a. That the Court enter an order declaring that Defendants' actions, as set forth in this Complaint, violate the law;
- b. That the Court hold Defendants jointly and severally liable for the injuries caused by each one of them and their non-defendant co-conspirators and award Plaintiff actual damages in an amount to be determined at trial, such amount to be trebled as permitted by law;
- c. That the Court award Plaintiff pre- and post-judgment interest on any recovery;
- d. That the Court award Plaintiff its costs of suit, including reasonable attorneys' fees and expenses;
- e. That the Court award Plaintiff a permanent injunction under Section 16 of the Clayton Act, enjoining Defendants from continuing to conspire with respect to the purchase of advertising from Plaintiff; and
- f. That the Court award such other relief as the Court may deem just and proper.

**Jury Trial Demand**

Plaintiff hereby demands a trial by jury of all claims so triable in this lawsuit.
